KuffGravMag — 2.5D Potential Field Modeling Report

Generated by KuffGravMag Geophysics Workbench

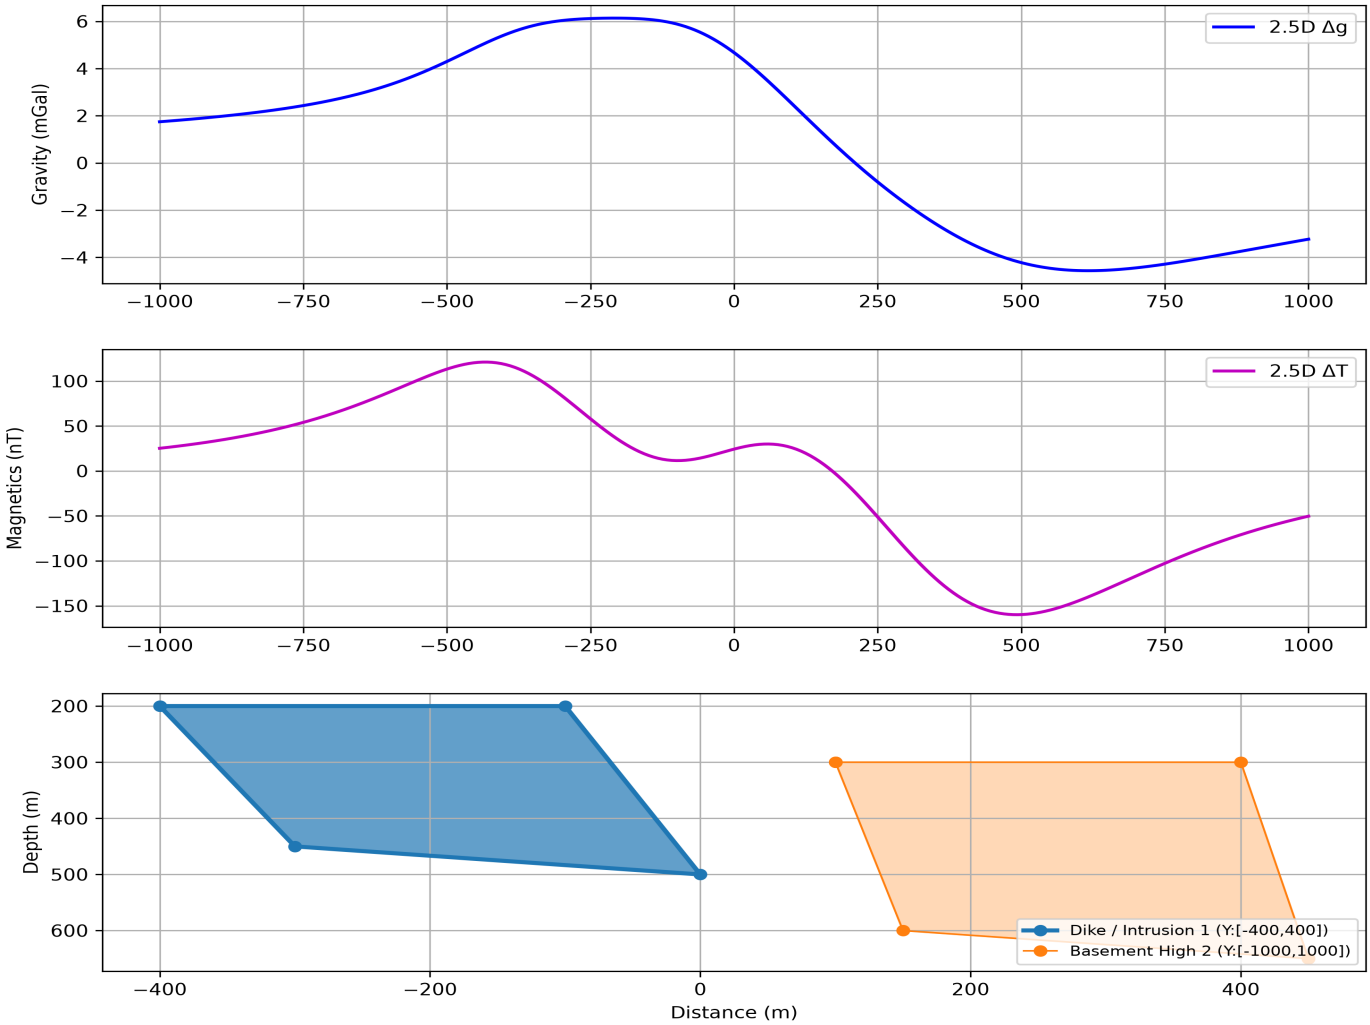

1. Regional Ambient Field Settings

Parameter	Value
Earth Magnetic Field (F)	48000.0 nT
Field Inclination (I)	55.0 deg
Profile Azimuth (α)	0.0 deg (North-South)

2. Subsurface Body Physical Properties

Body Name	Density (kg/m³)	Susceptibility (SI)	Remanence (A/m)	Strike Y (m)
Dike / Intrusion 1	400.0	0.0300	0.00	[-400, 400]
Basement High 2	-200.0	0.0100	2.00	[-1000, 1000]

3. Forward Model Anomaly Curves & Subsurface Geometry
